# Logo

At the heart of our brand is the Optimum logo, defined by its distinctive double-O, known as the Goggles. More than a typographic feature, the Goggles represent clarity, precision, and a new way of seeing performance at scale. Bold, simple, and instantly recognisable, the mark reflects Optimum's role in bringing focus and efficiency to how data moves across networks.

# Logo spacing

The Optimum logo is central to our brand identity and should appear consistently across all communications. These guidelines will help you use the logo with confidence, ensuring the Goggles remain clear, impactful, and unmistakably Optimum wherever they appear.

# Logo palette

Our logo comprises two core colors to maintain strong contrast for readability accessibility and recognition.

# Logo don’ts

To maintain clarity, consistency, and brand recognition, the Optimum logo must always be used as designed. Ensuring the logo remains clear, recognizable, and unmistakably Optimum across every touchpoint.

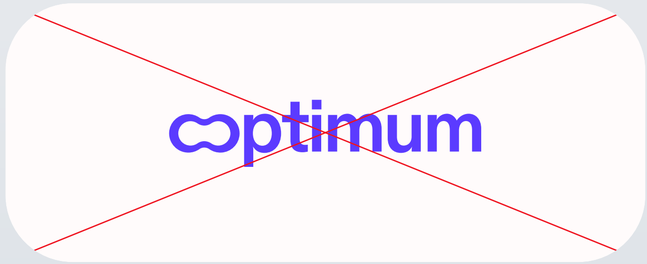

01: DON’T STRETCH OR DISTORT THE LOGO

02: DON’T ROTATE THE LOGO

03: DON’T CHANGE LOGO COLOR

04: DON’T APPLY DROP SHADOWS

05: DON’T APPLY GRADIENTS

06: DON’T CHANGE THE LOGO

# Logomark

The Goggles can be used as a standalone mark when space is limited or when a more subtle brand presence is needed. Whether used independently or alongside the full wordmark, the Goggles should always appear clean, consistent, and unmistakably Optimum.

# Logomark spacing

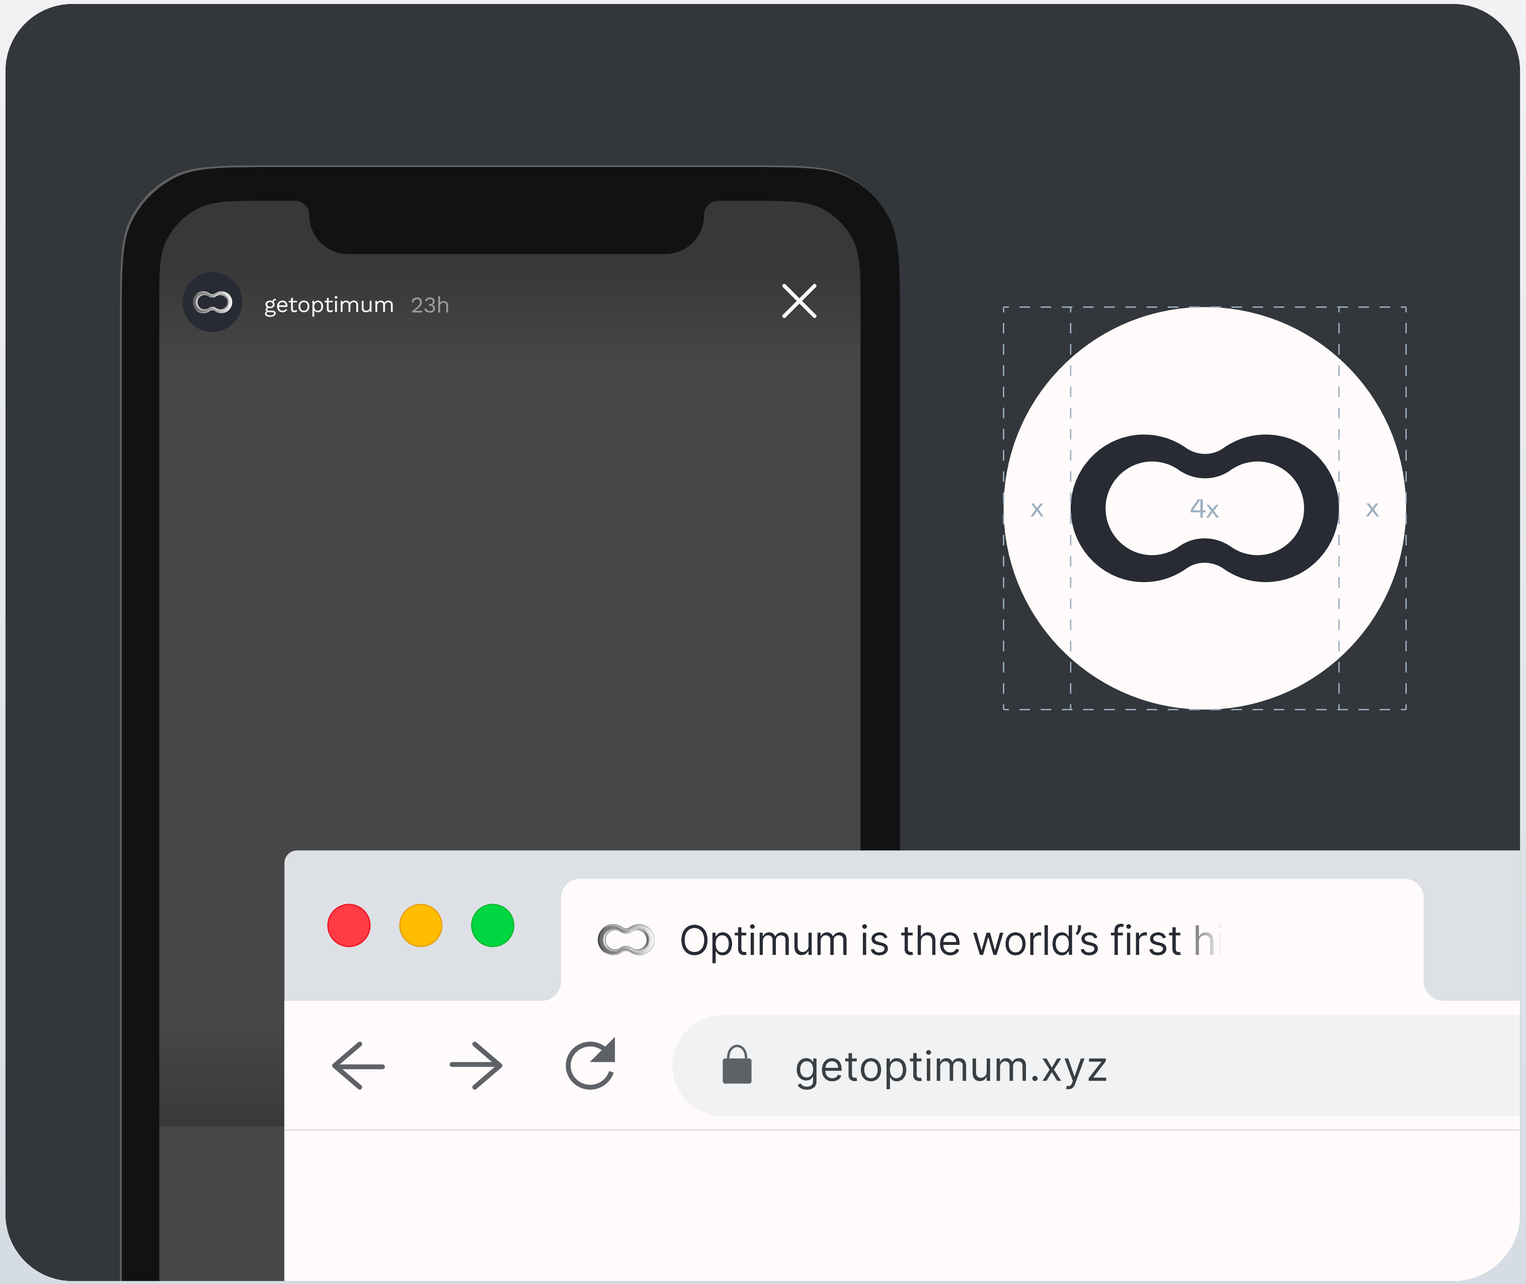

# Logomark palette

Our logomark comprises two core colors to maintain strong contrast for readability accessibility and recognition.

# Favicon

To maintain consistency, ensure the proportions of the googles logomark and the frame match like the mockup.

# Co-branding

When pairing optimum with another brand, maintain clear distinction by following proper alignment, spacing, and color contrast guidelines.

# Type usage

INTRODUCING OPTIMUM

# Advantages of RLNC in data propagation

## Run a flexnode to earn from the latency economy

### Lower Latency:

Optimum delivers blocks and blobs 2× faster than gossipsub while transmitting approximately 90–95% fewer bytes. Unlike gossipsub, Optimum uses RLNC to eliminate redundant transmission rather than flooding the network.
By reducing propagation latency, Optimum reduces missed attestations, missed proposals, and MEV leakage — all of which directly affect validator revenue.

# Meta-blobs

Meta-blobs are Optimum’s primary visual mnemonic, a distinctive and recognizable brand asset used across both static and animated communications. Fluid, adaptive, and precise, they represent data in motion and the intelligent flow of information across decentralized networks.

Overview
Optimum is the world's first decentralized high-performance memory infrastructure for any blockchain. Powered by Random Linear Network Coding (RLNC), Optimum scales L1/L2 speed, robustness and throughput by orders of magnitude, enhancing dapp performance and end-user experience.
